One of the best ways to be a better naturalist is by understanding the land in it's historical context. Nature based cultures often had deep relationships to plants, trees and animals that are still relevant in modern times. Think about how people would have used your landscape hundreds or thousands of years ago...

Henry Bates, the English naturalist, first began visiting Amazonia in 1848; and over a period of eleven years of study, he was able to classify some 14,000 different animal species, of which 7,000 were yet unknown. Invertebrates make up by far the largest percentage of species that are yet unknown to science.

Lambertini, A Naturalist's Guide to the Tropics, excerpt

Botanically, the area is more diverse than the Amazon," said Dominic Chadbon, a nature guide and native plant advocate. "There's no place else quite like it." Much of the plant life is fynbos, fine-leaved shrubs.
