### **Risk assessments - Asbestos**

In the asbestos risk evaluation, EPA reviewed 33 conditions of use. Below are the draft risk evaluation and supporting documents for asbestos. Following publication of the Federal Register Notice on April 3, 2020, the draft risk evaluation became available for public comment for 60 days in docket EPA-HQ-OPPT-2019-0501.

### **Draft Risk Evaluation for Asbestos | Assessing and ...**

Although the inhalation of asbestos fibers can cause serious health risks, the risk of asbestos-related disease depends upon the level of exposure to airborne fibers. How many fibers a person must breathe to develop disease is uncertain. However, at very low exposure levels, health risks are not serious.

### **Asbestos - Epidemiology**

Epidemiology and risk assessment were discussed. According to the author, epidemiological studies play an important role in detecting, validating, quantifying, and monitoring the effect of various risk factors on human health. It is noted that a major challenge facing epidemiology today is the necessity to explain the marked temporal, geographic, and ethnic differences in the incidence of cancer a

### **Epidemiology and Risk Assessment.**

If your work is likely to disturb or damage an asbestos containing material (ACM), then the employer or person in charge of the premises must ensure that an asbestos risk assessment is carried out. This means examining the potential risks to health and identifying which precautions are needed to make the work safe.

### **How to Conduct an Asbestos Risk Assessment - Free Template**
