The Journal of Bacteriology & Parasitology is specialist journal, which is known for its state-of-the-art presentation of the latest discoveries in Bacteriology and Parasitology. Bacteriology and Parasitology is a dynamic field, as these worms constantly change the morphology, hosts, and host relationships.

Bacteriology and Parasitology Peer Reviewed Journals

Bacteriology is a branch of microbiology that is concerned with the study of bacteria (as well as Archaea) and related aspects. It's a field in which bacteriologists study and learn more about the various characteristics (structure, genetics, biochemistry and ecology etc) of bacteria as well as the mechanism through which they cause diseases in humans and animals.

Bacteriology - Definition, Classifications and in Medicine

The Journal of Bacteriology® (JB) publishes primary-research articles that probe fundamental processes in bacteria, archaea, and their viruses and the molecular mechanisms by which they interact with each other and with their hosts and their environments.

SCOPE | Journal of Bacteriology

The proteins N PRO and E RNS are unique for the genus Pestivirus, but only N PRO has been demonstrated to be nonessential for in vitro growth. While this was also speculated for E RNS, it has always been previously shown that pestivirus replicons with deletions of the structural proteins E RNS, E1, or E2 did not produce any infectious progeny virus in susceptible host...
