Global Bitumen Industry - PR Newswire

Bitumen emulsion is a mixture of fine droplets of bitumen and water. But as the bitumen is a petroleum product it doesn't mix with water and as it is sticky in nature, it doesn't easily gets disintegrated into fine droplets. To overcome this problem an emulsifier is used. Emulsifier can be defined as a surface-active agent.

Bitumen Emulsion - Types, Uses, Advantages and Manufacture

WACKER has developed binders based on Vinyl Acetate-Ethylene (VAE) copolymers specifically for bitumen emulsions under the tradename VINNEVA®. On the one hand, the product line is intended to convince users of non-modified bitumen emulsions of the benefits of a polymer additive - this makes the coatings more flexible and more resistant to all kinds of mechanical stress.

Based on grade type, the global bitumen market is segmented as paving grade, hard grade, oxidizing grade, bitumen emulsions and polymer modified bitumen. On the basis of application, the global bitumen market is categorized into road construction, water proofing, adhesives, and insulation.

Bitumen Market Size, Share, Trend, Growth And Forecast To 2025

Polymer Modified Bitumen Emulsion market is segmented by region (country), players, by Type, and by Application. Players, stakeholders, and other participants in the global Polymer Modified Bitumen Emulsion market will be able to gain the upper hand as they use the report as a powerful

resource.

Global And Polymer Modified Bitumen Emulsion Market ...

Advantages of bitumen emulsions over normal bitumen will drive the product market in the forecast years. Asphalt emulsions have advantages such as its usability in damp environment and with wet aggregates. It can be used for any road maintenance work in minimum time and provides better coating as well as workable conditions.

Bitumen Emulsifiers Market worth over \$150mn by 2024

On the basis of product type, in 2018, paving grade accounted the largest market share of 57% in terms of revenue, followed by oxidized grade and bitumen emulsion. The demand for paving grade bitumen is expected to rise in forthcoming years due to increase in its usage for making pathways, railway beds as well as in road maintenance.
