Wire colors in your car might be different than colors described here. Use the given colors for reference purposes only. Always test wires to make sure they are correct. We are not responsible for any misprints. To check hot, ignition, lights, dimmer, use a test light or voltmeter. To check speakers use test radio.

## **Car Audio - Wire Color Codes**

The black wire is usually the negative wire and should be attached to the negative terminal on the speaker. The solid or white striped wire is the positive and should be attached on the positive terminal on the speaker. Do not reverse the polarity of the speakers as opposing speakers will technically cancel each other out.
