In the last 30 years, Approximation Theory has undergone wonderful development, with many new theories appearing in this short interval. This book has its origin in the wish to adequately describe this development, in particular, to rewrite the short 1966 book of G. G. Lorentz, "Approximation of Functions." Soon after 1980, R. A. DeVore and Lorentz joined forces for this purpose.

The present book deals with some basic problems of Approximation Theory: with properties of polynomials and splines, with approximation by polynomials, splines, linear operators. It also provides the necessary material about different function spaces. In some sense, this is a modern version of the corresponding parts of the book of one of us (Lorentz [A-1966]).
