Cycling and Society - Google Books

Cycling is a key everyday mode of mobility in the developing world and parts of northern Europe, and one which is increasingly being promoted by governments of car-dominated societies such as the UK. Yet whilst the complex and hugely valued practice of cycling addresses important issues in social theory including sustainability, healthy lifestyles and urban quality-of-life, it has been ...

When you look at the state of the world today, do you think that perhaps people way smarter than me, or dare I say smarter than Dr. John Bergman, actually understand this cycle and are driving our society toward these steps — to get to where they want to be? There is still much controversy over the fact that a world government is being set up under the guise of Codex Alimentarius and Agenda ...
