Geometric Dimensioning and Tolerancing (GD&T) is a system for defining and communicating engineering tolerances.It uses a symbolic language on engineering drawings and computer-generated three-dimensional solid models that explicitly describe nominal geometry and its allowable variation. It tells the manufacturing staff and machines what degree of accuracy and precision is needed on each ...

Department of Mechanical Engineering and Mechanics How are Tolerances Specified •Size – Limits specifying the allowed variation in each dimension (length, width, height, diameter, etc.) are given on the drawing • Geometry – Geometric Tolerancing • Allows for specification of tolerance for the geometry of a part separate from its size

Geometrical Dimensioning & Tolerancing (GD&T)

Engineering drawing is the most important aspect of mechanical engineering, as it is the fundamental need to develop the design and assembly of a machine. While the interpretation of a component in terms of sketching can be done in various methods, related to Descriptive Geometry, the three most necessary techniques of drawing/projection are:
