...

A Good Manufacturing Practice (GMP) system ensures that manufacturing products, such as food, cosmetics, and pharmaceutical goods, are consistently produced and controlled according to set quality standards.

What is Good Manufacturing Practices (GMP) | SafetyCulture

Good manufacturing practice (GMP) is a concept that ensures products are consistently produced and controlled according to quality standards. It is designed to minimize the risks to the patient involved in any pharmaceutical production. GMP constitutes the license to operate in pharmaceutical manufacturing, and is a core condition worldwide.

What is GMP? (Good manufacturing practice)

GMP is part of a quality system covering the manufacture and testing of pharmaceutical dosage forms or drugs and active pharmaceutical ingredients, diagnostics, foods, pharmaceutical products, and medical devices. GMPs are guidelines that outline the aspects of production and testing that can impact the quality of a product.
