**A Heat Transfer
Textbook, 5th
edition**

Summary □ Heat is a form of energy which flows as a result of temperature difference between two regions. □ There are three modes of heat transfer namely conduction, convection and radiation. □ In conduction and convection a material

Introduction To Heat Transfer 5th

is required while in radiation, heat travels through a vacuum. □

Thermal conductivity depends on:

Temperature difference-
the greater the
temperature difference
the higher the rate of
conduction.
