The purpose of hazard control guidelines in the OSU-CHS Chemical Hygiene Manual is to evaluate and monitor chemical hazards and where possible, design and implement control measures to reduce hazard exposure; and provide training and information to lab workers regarding the hazardous chemicals they may work with.

UNIVERSITY OF TULSA

The overall food hygiene system, when applied at each point in the supply chain, is about managing risks before they result in a case of food contamination. Using common sense and food science based approaches, a well-designed food hygiene program can provide for proactive responses and risk-mitigation from farm to fork.
