### Single Cylinder Engines | Laser Engines

The engine is ideal for big scale aircraft due to its layout, excellent throttle response, smooth running and ease of handling. The crankcase and radial mount assist in keeping the engine cool meaning the 360v is very tolerant of being under a cowling. At low rpm on large propellers the engine has a distinctive and realistic sound.

Laser propulsion is a form of beam-powered propulsion where the energy source is a remote (usually ground-based) laser system and separate from the reaction mass. This form of propulsion differs from a conventional chemical rocket where both energy and reaction mass come from the solid or liquid propellants carried on board the vehicle.

Base Lasers carry a 92 hp (69 kW) 1.8 L four-cylinder engine, whereas a 135 hp (101 kW), 2.0 L DOHC four-cylinder was optional with the Laser RS. The top-of-the-line RS Turbo uses a turbocharged 2.0 L rated at 195 hp (145 kW). A five-speed manual transmission was standard.

### Plymouth Laser - Wikipedia

It features the same welded, heavy-duty, 1.5"x 3" tubular steel unibody frame found throughout our Lazer Z models. You can also choose from two rugged Kawasaki® V-Twin engines or a Kohler® Command™ EFI engine matched to a full-floating, UltraCut™ Series 4 cutting deck, in 48, 52, 60 or 72 inch widths. A digital operator diagnostic module simplifies system monitoring and troubleshooting, while the fuel gauge uses ultrasonic waves to provide a more accurate reading.

After the engine, the most expensive components on virtually all mowers are the hydro drive units. The 'Hydro Drive Life Extension Program' was created to eliminate the concern of these items failing prematurely. For all owners of Exmark Lazer Z E-, S- and X-Series and Radius E-, S- and X-Series zero-turn riding mowers. [Learn More](#)
