Montana Traffic Engineering Manual

The purpose of the FDOT Traffic Engineering Manual (TEM) is to provide traffic engineering standards and guidelines to be used on the State Highway System. The manual covers the process whereby standards and guidelines are adopted, as well as chapters devoted to highway signs, traffic signals, markings, and specialized operational topics.

Traffic Engineering Manual - FDOT

The MDT Road Design and Traffic Engineering Manuals, for example, contain the agency's road design and traffic engineering processes, describe the practices followed by the department during highway project development, and outline detailed information about basic design controls, geometrics, and design criteria.
