PL/SQL Declaration Section; Related articles. WITH Clause : PL/SQL Declaration Section ; WITH Clause Enhancements in Oracle Database 12c Release 1 (12cR1) Recursive Subquery Factoring : Hierarchical Queries Using Recursive WITH Clauses; Setup. The examples below use the following tables.

### ORACLE-BASE - WITH Clause : Subquery Factoring in Oracle

Starting in Oracle9i release 2 we saw an incorporation of the SQL-99 WITH clause (a.k.a. subquery factoring), a tool for materializing subqueries to save Oracle from having to re-compute them multiple times. The SQL WITH clause is very similar to the use of Global temporary tables (GTT), a technique that is often used to improve query speed for complex subqueries.

### SQL WITH clause tricks - Burlleson Oracle Consulting

Using Semijoins: Example In the following example, only one row needs to be returned from the departments table, even though many rows in the employees table might match the subquery. If no index has been defined on the salary column in employees, then a semijoin can be used to improve query performance.
