The symptoms follow: The unit is turned on, the power vent fan begins to run, the hot surface ignitor glows, there is a click, gas is released and the unit fires properly and begins heating. After approximately 5 minutes there is another click and the gas supply is cut off (I assume) and the unit turns off.

I have a power vent2 water heater by Rheem products. Problem seems to be with blower fan turning on when thermostat calls for heat. Fan makes un-able to start noise and thermostat stops. If I turn the switch off and turn it on, then the thermostat calls for turning the fan on but the fan doesn't want to run -- i repeat this about 4 - 5 times and then finally the fan starts running and the ...
