is a complete proven & reliable control system for Injection Molding Machine. System consists of three units.

- (1) Display unit
- (2) Input/Output drivers
- (3) C.V.T. (Optional)/Transformer

(1) Operating Panel:

This is small lightweight Display unit with soft touch keypad & TFT colour screen.

materials into a broad range of components and products. Unlike the standard reaction injection molding process, which relies on pressurized impingement mixing, liquid injection molding uses a mechanical mixing process that focuses mainly on liquid silicone rubber (LSR) and similar elastomeric materials.
