The seven basic emotions related to organ function are anger, joy, worry, pensiveness, sadness, fear, and shock (fright). Although the mind/body connection has been acknowledged only relatively recently in Western medicine, the interaction of emotions with the physical body is an essential aspect of traditional Chinese medicine.

The Seven Emotions | HowStuffWorks

A modern Chinese book says: "When emotions cause stagnation of Liver-Qi this impairs the Spleen transformation which leads to Phlegm; or emotional stress may lead to Qi stagnation which may turn into Fire: ... Foundations of Chinese Medicine, Practice of Chinese Medicine and Tongue Diagnosis in Chinese Medicine are all outstanding ...

Phlegm-Heat in Chinese Medicine - Giovanni Maciocia

There are 7 emotions we differentiate between in Chinese medicine. It is important to know that organs have strong relationships with one another, so if one is affected, the others are too. Over-Excitement. Excitement/mania is the main emotion of the heart. When someone experiences highs that are too taxing, they burn out their nervous system.

Here's The Strange Connection Between Your Emotions + Organs

As yin and yang continuously adjust to one another and transform into one another in a never-ending dance of harmonization, they tend to do so in a predictable pattern. In both Chinese philosophy and medicine, these stages of yin-yang transformation are referred to as the wu xing, the "five phases of transformation." They are listed below.
